Exercise 7: Enabling Entity Auditing

Business Scenario: Implement auditing to track the creation and modification of employees and departments.

 Instructions:

- **Entity Auditing:**

    - Enable auditing in your application by configuring auditing properties.

    - Use annotations like `@CreatedBy`, `@LastModifiedBy`, `@CreatedDate`, and `@LastModifiedDate`.

```
Start
  |
  v
Enable Auditing
  |
  v
Use Auditing Annotations
  |
  v
End
```
